## Overview

---

The first of the Wally Nano MKII series “Pilgrim”, was built by the renowned Dutch Dragon builder Doomernik Yachts, deploying the latest advanced composite technology with a sandwich of carbon fiber and epoxy resin.

The mast and boom are also in carbon fiber, resulting in a displacement of just 2,750 kg. The hull design has been extensively researched and tested with VPPs and CFD analysis. A spectacular aft transom overhang and plumb bow create a long water line with a magnificent retro look. The flush deck is entirely in teak and a cabin top with vertical glass sides provides an inside-outside living concept.

The deck features a large open cockpit with integrated aft deck, resulting in a large sunbathing area.

Pilgrim is docked in Palma de Mallorca, and visits by appointment are welcomed.

For more details and information please download the Pilgrim brochure or inquire at .
