DETAILED INFORMATION

Builder Specifications

CUSTOM DELIVERY Each Alen 55 is custom built to order for the individual client. From the color of the hull & superstructure, entertainment & navigation equipment, down to the interior layout & décor. Construction can be completed in 6-8 months and delivery can take place anywhere in the world. Having experienced the Alen 55 first hand, nothing comes close to the quality to value ratio that you find onboard. She is best in class both in style, design, & performance. Key features: • Seakeeper gyro stabilization • Large volume interior décor with 1 or 2 cabin layouts • Extremely seaworthy ride even in poor weather conditions • Best in class deck spaces including lounge area, dining & bow seating • Complete bespoke customization

OVERVIEW Sociable, safe and stylish The yacht's timeless, traditional design has built-in practicality. Her center console, walk-around deck and deep bulwarks create a safe, spacious environment where guests are 'in' rather than 'on' the deck. Whether they are at the helm, cooking or simply relaxing, everyone can be together. Up to 8 guests can comfortably sit at the extending table, near the open kitchen. At the shaded helm, the controls include the latest navigation equipment and a button to operate the hidden, custom-made anchor mechanism. Behind the aft sun-bed, the hydraulic gangway also doubles as a convenient swim ladder. 'Intelligent inspiration' sums up the design of the yacht's interior, which can be customized to the owner's requirements. A crew cabin or extra bedroom can be included, the lounge sofa converts into a double berth and the cabins have generous storage space. Teak flooring, leather wall panels and lacquered surfaces produce a warm, natural ambiance.

WALKTHROUGH The Alen 55 is powered by twin Volvo 800s which push her to a top speed just under 33 knots. At 1,800rpms she is cruising at 24 knots, and at 2,000rpms she's smooth at 27knots. She is the perfect combination of power & grace all done with the comfort of a Seakeeper gyro stabilizer. She is easily recognizable by her high bulwarks & forward carrying beam giving her a masculine profile. Teak decks & cap rail soften her looks giving it almost a classic feel. What I love about the design is that it is extremely safe for families and children. The helm gives great visibility with a 360-degree view allowing ease of maneuvering. Aft of the helm is a lounge/dining area complete with wet bar followed by sunpads. The open transom has steps leading to a spacious swim platform making boarding easy. Continuing below deck there are two layouts available. One has a large open cabin stretching towards the bow. This space can alternatively be utilized as a lounge area illuminated by a coach roof strip skylight with wraparound seating. A two-cabin option can also be specified offering a full double berth. There is a head to port complete with rain shower and teak flooring. Amidships is a snug secondary cabin with transverse single berths, a second head with full standing headroom and two hanging lockers & separate climate controlled zone. The headroom throughout the entire interior is close to 7' so very roomy and not just an afterthought like you find on some of these dayboats. The engine room holds twin Volvo 800s and the Seakeeper gyro

system yet still offers space to move around. There is also a Besenzoni passerelle & hidden deck shower with hot water. Again, no detail has been overlooked. The Alen 55 is an accomplished performer with a composite, AIREX-cored construction giving her a displacement of 21 tonnes, and her tanks give her enough fuel for a 250-nautical mile range at 28 knots which is her ideal cruise speed. Boat International has this to say about the Alen 55: 'Accommodating, well finished, sturdy, attractive, with curves in all the right places, she's fast and loose with a throaty roar when you're alone on the seas and yet elegant and perfectly mannered when in port. What more could you ask for?' The breakthrough in terms of concept, quality and unique style that distinguished the Alen 42, has now been taken into new heights with the Alen 55. With a center console and walk-around deck, the Alen 55 is comfortable, safe and easy to operate without the need of crew. Live life outside is the spirit of the Alen 55 with an unusually generous and well thought out deck space. The Alen 55 is a great family boat, safe for children and friends with a single-level teak deck and deep bulwarks so that you are always 'in' rather than 'on' the boat. The walk-around aft sunbed offers easy access to the swimming platform making it a wonderful place to enjoy by the sea. The hydraulic gangway, which also doubles as a swim ladder provides an ideal way to come in and out of the sea. Meals may be enjoyed on deck with an extending table that comfortably seats eight guests. The Alen 55 has an open kitchen with all the appliances to prepare a delicious meal on deck. The mid-ship layout is carefully designed to ensure that guests can interact regardless of whether they are at the helm or cooking. Whilst aft and bow give total sense of privacy. An additional sun awning can be raised to cover the aft sunbathing area secured by two carbon poles set into the bulwark. The custom-made anchor mechanism operates with the push of a button from the dashboard. No hydraulic or electric system is used that requires constant maintenance or gives any chance to failure. The hidden system also preserves the sleek lines of the Alen 55. The well protected and shaded central helm is equipped with the latest navigation equipment to make your life at sea safe and more enjoyable. 'Intelligent inspiration' sums up the design of Alen 55's interior. Teak flooring, leather wall panels and lacquered surfaces produce a warm, natural ambiance. In furnishings, the Alen 55 can be completed almost any way an owner chooses, from the general arrangement of cabins to fittings, all is made possible with the spacious interior volume. The custom-made sofa in the lounge can easily convert into a double berth for additional overnight guests. The cabins have very generous storage space without compromising the clean lines and spacious feel. There is a selection lighting options that can be changed depending on your mood. The glass separation gives light and depth into the aft cabin. With two different interior layouts, the Alen 55 can be configured as a day or chase boat containing two crew berths and a very spacious lounge with separate bathrooms for the guests and crew. The alternative is designed for long cruises. Two cabins, separated by a lounge, ensures a comfortable stay on board for up to 5 guests.

SHIPYARD HISTORY With a 20-year heritage in yacht design and construction, Alen Yacht has established a reputation for innovation and uncompromising quality. This has been achieved by blending traditional marine craftsmanship with 'state-of-the-yard' boatbuilding technology. With fastidious attention to detail, we lovingly create yachts

that lead the way in both design and engineering. Each Alen Yacht is tailor-made to meet the precise needs of its owner. All elements, from the navigation system to the cabin configuration, are individually customized. At the same time, each yacht shares similar elegant lines and timeless design features. Our yachts are commissioned by those seeking a 42–68-ft craft evoking the standards of a superyacht. To maintain this hard-earned reputation, our yard in Istanbul is awash with the most modern facilities. These include an advanced hull-engineering department and a fibre workshop with pressurized fresh air system. Importantly, we use our indoor testing pool to make sure each yacht is manufactured to the highest standards. We may be traditional artisans, but we respect 21st century innovations. **EXTERIOR** Teak deck Custom dashboard Companionway door Glass holders Custom fitted cushions Manuel swimming ladder Chemically tempered windscreen S/S handles & handrails Retractable anchor davit 80m.
