Full Teak Deck Hi-gloss teak countertops

Teak Bow Table Custom wood-grain steering wheel

Custom Teak Battle Saddle Chair Forward aft Tahitian shades

Fighting Chair Deck pad reinforcement

Spray wings Custom covers

Tow Bridle

53 Sueños. THIS is the boat you've heard about...

The HCB53 is the first boat to be awarded Structural Composites' MIL-TOUGH Rating. The MIL-TOUGH Rating comes from the design and use of performance composite materials including Interplastic Vinyl Ester Resin, Kevlar, Prisma Advanced and MEGAFORM composite preforms and high strength engineered orthotropic fiber reinforcements. By leveraging millions of dollars of US Navy research on advanced combatant craft, HSC53 features an advanced single skin hull bottom and transom offering the ruggedness of single skin construction at a lighter weight than sandwich construction.

Innovation starts with the HCB53 lamination and advanced structural construction. Enhanced by power supplied by Yamaha or Seven Marine whose cooperation with the build have provided for maximum propulsion and innovative control systems with joystick steering; available with Yamaha Helmmaster for quad engine applications. The combination offers performance when needed, plus agility and precision when on station or docking.

Designed for minimal bow rise and accompanied by an elevated helm station offers uninterrupted visibility of the horizon. The helm is integrated with triple Garmin 8000 series electronics. This makes for the ultimate safe passage while underway. These

state-of-the-art electronics utilize environmentally safe AGM batteries and Master Volt charging system to monitor and charge all batteries on board. This provides enough 12v power to run the cabin air conditioning without need for a generator.

The HCB53 is the ultimate angling correct fishing machine sporting 40 rod holders, dual pressurized baitwells, is pre-rigged for electric deep drop rods, a massive rigging station, tons of tackle storage and fish boxes so large you are likely over your limit if you fill them.

While fishing reigns, comfort abounds. Under the console is a surprisingly spacious cabin with air-conditioning, refrigerator, microwave, seating, separate head with shower and a queen size berth. Luxurious and puncture-proof carbon fiber upholstery is customized to match the boat's hull and is utilized for all seating and bolsters. At the helm, suspension seat pedestals provide a smoother, more comfortable ride. Fish boxes, coolers and freezer are custom built-in components made by Frigid Rigid. A rocking premium sound system is standard. Able to run at high speeds in any conditions, the HCB53 is specifically designed to be the most comfortable angling correct boat ever built.

With careful oversight from HydraSports Custom ownership; the design team has totally reinvented boating... again.

Basic Information

Category: Center Console

Model Year: 2016

Year Built: 2016

Country: United States

Vessel Top: Hardtop
