# DETAILED INFORMATION

---

## Features

---

### REMARKS:

MOESY ON is presently the newest Viking 54' Convertible available in the market. Lovingly cared for by its knowledgeable owner and captain, MOESY ON is the ideal combination of family fishing/cruising boat with all the features and benefits offered by this popular Viking model.

Featuring the desirable three stateroom/two head deck plan with the island queen master amidships and the VIP double berth/quarter berth layout forward and an generous third stateroom off the companionway to starboard with twin berths, the layout is both flexible and accommodating to the owner's party and their guests. A great mix of fishing & cruising options make MOESY ON a wonderful choice for cruising the islands or fishing the tournaments. Easily available for inspection, MOESY ON will not disappoint even the most discriminating of buyers. Call today to arrange an appointment to visit MOESY ON.

### WALKTHROUGH

Commencing in the well-appointed and spacious cockpit, MOESY ON's fishing amenities are on full display. The molded in transom mounted oval bait well, transom gate and door, and custom teak rocket launcher provide convenient tools to "hook'em up" and the large in deck fish boxes with the available Eskimo ice feed provides a place to keep them cold once you've caught them. The generous bait freezer in the mezzanine, and refrigerated drink cooler at the salon entrance along with rod holders, gaff storage, tackle cabinet, and mezzanine seating complete this area.

Moving forward to port is a ladder leading up to the commanding and comfortable flybridge. This deck is dominated by the main helm console with a full complement of navigational electronics and the centerline custom teak steering console with single lever electronic engine controls. An overhead compartment recessed into the hardtop above the captain's station accesses the electrically operated teaser reels. Seating for this area centers on the twin custom teak helm and companion chairs with additional guest seating to port as well as forward of the electronics console. Storage is plentiful throughout the area under both the seating and helm console with a refrigerator/freezer compartment forward to starboard. This area is protected from the wind and water by EZ2CY enclosures on three sides.

Back in the cockpit, the engine room and machinery space is accessed through a large lift up hatch incorporated into the mezzanine area. Vikings are known far and wide for their superb machinery spaces and MOESY ON is no exception. At the center of this space the twin 1550 HP MANS that provide the beating heart of this high performance

sportfisherman sit mounted on steel I-beam stringers surrounded by all the electrical and mechanical service equipment necessary to keep it running at optimum performance. The entire space is painted in gleaming white Awlgrip for practical cosmetic durability and cleanup.

Once more, back in the cockpit and through the port side power operated sliding door we enter into the interior salon of the boat. The entire interior space is richly appointed in satin finished teak wood panels, valances, and cabinetry, with soft neutral tones dominating the upholstered and carpeted surfaces. This salon area features a large, L-shaped settee commencing at the aft bulkhead and wrapping around the starboard side then continuing on to form a large dining settee and table forward. There is a high/low teak coffee/dining table in front of the salon settee. Finally, above the dining settee forward to starboard is the large 42" flat screen TV. The salon windows allow for bright light and panoramic views unless you want privacy in which case the Hunter-Douglas window shades can be lowered in moments.

To port and extending out into the salon is the large service counter with a custom granite top and two barstools for seating. Forward of this is the comprehensively equipped galley with two Sub-Zero drawer refrigerator/freezer units, three burner ceramic top stove, microwave/convection oven, stainless steel sink, teak cabinets and slide out, concealed pantry drawers.

Continuing forward to starboard and down three steps the three stateroom/two head sleeping accommodations for the owner and his guests and crew are accessed. Furthest aft to starboard is the second guest cabin with crossover bunk beds and storage. This is a generous third cabin, well-appointed and large enough to move around in comfortably and featuring a private entrance door to the guest head.

Further forward to starboard is the large guest head with separate stall shower, freshwater vacuflush head, vanity and sink along with a fully equipped washer/dryer closet. Three doors allow for access to the two guest state rooms as well as allowing for day access from the companionway.

All the way forward is the VIP stateroom laid out with an offset double berth to starboard and a single berth opposite and above to port for maximum flexibility for various guest parties sleeping arrangements. Generous hanging locker and drawer storage a separate flat screen TV, and private entrance into the guest head completes this state room.

Finally, to port and amidships is the comfortable and private master suite featuring a centerline island walk-around queen berth with the upgraded System 3 mattress and easily accessed storage beneath. Hanging lockers and drawer storage give ample space for clothing and belongings and the flatscreen TV and entertainment center along with the fully equipped separate private owner's head and shower provides virtually everything needed for comfort and convenience for even extended trips aboard.

## FLYBRIDGE

- Electronic trolling valves
- Electronic single-lever controls for helm pod
- Costa helm cover
- Fiberglass hardtop with molded in- quartz lights
- 3 sided EZ2CY enclosures
- 6-rod Rocket launcher on Flybridge aft rail
