SPECIFICATIONS

Overview

Nauta Air 90' is a two deck semi displacement vessel in aluminum, 27,65 mt in length-overall and 6,5 mt in beam for a gross tonnage of 170.

The Nauta Air range of vessel has been designed by the renowned studio Nauta Design, the ones that penned Azzam the longest yacht in the world with her 180 mt of length overall. It's Nauta Air series is characterized by a design made to last, with exterior lines that are contemporary but endless, sturdy and masculine but stylish, light and clean in every detail.

Two special features distinguish this vessel. One is the fly bridge. It is more than 70 sq mt and there is no one yacht up to 105 feet in the market who has a fly bridge as big as this. This helps to live in an area with a 360° view and 4 different entertainment functions (sunbed, lounge, dining, conversation/bar) without feeling too cramped. The other feature is the huge full beam master cabin on the lower deck with big windows. It really feels to be on a much bigger boat and gives an amazing feeling when cruising with only 55 db at 12 knots.

As per CdM standard, Nauta Air 90' comes with a fully loaded specification: electric zero speed stabilization, black water treatment, motorized bilge valves, laundry system, high standard navcom and entertainment, are only a few of those items.

Photos of M/Y Noga are featured in this listing. Each CdM yacht is custom built to order and will be completely customized at the request of the individual client: whether it is the custom color of the hull & superstructure, layout of the sundeck, interior decor, or the general arrangement floor plan - every detail is customized.
