SPECIFICATIONS

Overview

The Canados 88' Evolution is sharing the technical platform of the more than famous Canados 86'. The 88' Evolution called for lots of re-engineering to be able to keep the same low center of gravity as its estimated predecessor, the Canados 86' while offering unprecedented glass surface on the main deck. The 88' Evolution deep V Hull allows running the boat in total comfort even in rough seas. For more information, call us today!

Electrical System

Main characteristics

- 220 VAC mono-phase, 60Hz for circuits, switches, TV and Hi-Fi
- 24 V DC for lights and navigation systems
- 12 V DC for generators starting and VHF
- 24 V DC engine starting system

The main electrical switchboard is located in the lazarette at which refers all the IN sources and OUT supplies to the yacht needs.

It is physically constructed in two sections, the first one contains the 220 V AC 1-phase distribution, the second one contains the 24 V DC distribution. From the two sections, through thermo magnetic switches, all the 220 V AC and 24 V DC needs on board shall be supplied. A complete command control system is located in the wheelhouse.

The galley is equipped with a sub electrical switchboard that, through thermo magnetic switches, ensures the distribution to all appliances.

All the devices are connected through copper strings to the ground.

Alternative Current energy sources

Generator

- 2 KOHLER 28Kw, 60Hz 220 V 1-phase generators located in the engine room, equipped with soundproof boxes, control panels and hour counters.
- The batteries are charged by a dedicated 12V-25A battery charger. Generators' batteries can be operated in parallel.

Ground outlets

- 2 x 50 A, 220 V 1-phase, 60Hz ground outlets, the port side outlet supplies all the yacht while the starboard one supplies the air conditioning system.

Inverter

When the 220 V AC is not available, the 1500 W MASTERVOLT inverter (connected to the service batteries) supplies power
