## Overview

---

Unlike any other yachts in the category, the 901 Gladiator not only delivers amazing speeds, she can sustain fast pace in formed seas! And for the most speed addicted, the triple engine version offers a mind-boggling top end speed in excess of 60 knots. But like all the Canados productions, the 901 Gladiator has been engineered with versatility in mind. Thus, we also offer a more reasonable version powered by twin 1,900 HP engine coupled to V-Drives offering a 27 knots cruising speed and a 32 knots top speed. Designed from scratch to achieve exceptional performances, the Gladiator 901 hull was engineered for surface drives. For more information, call us today!
