SPECIFICATIONS

Overview

THIS EXACT BOAT AND OWNER FEATURED IN 2015 POWERBOAT AND RIB MAGAZINE "THE ABACO CHRONICLES" (request and I'll e-mail you PDF of article) North American Factory Demonstrator recently upgraded to 30' TARGA standards with the higher power, best equipment and the most comprehensive marine electronics package of any Protector on the market. This USCG Documented open ocean vessel was highlighted in Powerboat and RIB Magazine feature article in 2015 covering a 1500 mile Caribbean islands voyage. This Protector has unrivaled performance with a top speed of over 65 mph on "Any Water, Anywhere." It has enhanced ergonomics and bigger power, yet is still easily trailerable with the included trailer, without a permit, by an large SUV or half-ton pickup.

The Protector TARGA Rigid Hull Inflatable Boats is the perfect all weather vessel with the range and speed to cover all potential operations from recreation to a fast response or tow vessel. The Protector was designed to accommodate multiple large Multi-function navigational displays for better ergonomics while also considering creature comforts such as a custom stowable teak picnic table.

The helm has dual shock mitigating captain's chairs, which permit cruising at high speeds in rough conditions while maintaining excellent visibility, control, and comfort. Passengers aren't neglected with a new custom SKYDEX shock mitigating rear seating.

The dual Verado 250 outboards have been upgraded to 340 hp by Simon Motorsports and equipped with new Mercury's state-of-the-art EcoEneria props permitting an economy cruise of 40 mph nearing 2 mpg.

Manufacturer Provided Description

The Protector TARGA design offers a fully enclosed cabin design with comfortable deck space, seating for up to 10 adults, two 7' bunks, electric head and secure storage for overnight boating. Optional TARGA cabin tops include a full glass windshield hard-top, a 3/4 windshield hard-top and a 3/4 windshield canvas top with a stainless steel frame. The TARGA's solid laminate, fiberglass hull is built for strength and safety and the chambered hypalon tubes provide shock absorption, stability and additional flotation.

Together, the deep-V hull and UV resistant tubes create unmatched safety and performance compared to traditional hard sided boat designs.
