DETAILED INFORMATION

General Specifications

The Ferretti 731 is the new expression of the Ferretti style: a highly innovative project born from a revolutionary concept of both outside and inside spaces. Starting from the unusual symmetric perspective of the spaces which dominates both the interior and the flying-bridge layout. The ship owner's cabin presents the most important innovations of Ferretti in terms of light and space exploitation: placed lengthwise, it has a large panoramic window on both sides allowing an open view of the sea from each view point inside the boat, and a spacious shower, separated from the bathroom by a sliding door. The huge and comfortable living room with the luxurious furnishings in opaque teak have been totally redesigned to make life onboard even better and to enhance the brightness of the interiors. The new layout also includes a little swim platform which represents a further outside area where enjoying the sea in the utmost tranquillity.
