Hull and Deck Information

Hull Material: Aluminum

Exterior Designer: Broward Marine

Engine Information

Engines: 2

Manufacturer: DDC/MTU

Model: 16V92-TA's

Fuel Type: Diesel

DETAILED INFORMATION

Walk-Thru

STELLA MARIS was built as "Fantasy" in 1993 by Broward Marine which illustrated a progressive vision of elegance combined with the most elaborate interior of that time period. She was built as a "study of firsts" most notably utilizing the builder's new Euro-style hull design and space configuration. Her immense interior volume is equal to the space found on much larger yachts. Her ample 23' beam provides the extra large staterooms and affords the convenience and privacy of two-thirds walk-around side decks without compromising the main salon's volume. From both inside and outside, the yacht's enormous floor-to-ceiling main salon windows are her most distinctive feature offering unobstructed panoramic views. Her formal dining area is located forward of the main salon with seating for up to ten. Cherry wood, granite and strategic lights are used throughout the vessel. The on-deck master stateroom is tastefully appointed and features His and Her baths. Each of the yacht's four guest staterooms located on lower deck, was designed with its own distinct theme and features private baths and full entertainment center. STELLA MARIS aft engine room houses twin 16V92TA's equipped with Detroit Diesel electronic console monitoring system coupled to Ulstein tractor-style drives. This impressive power package pushes to a 18 knot continuous cruise. Her pilothouse features Isis ship's monitoring system and a full array of navigational and communications electronics.
