LOA: 35' 0" (10.67m)

LWL: 37' 3" (11.35m)

Beam: 14' 0" (4.27m)

Min Draft: 1' 8" (0.51m)

Max Draft: 5' 6" (1.68m)

MFG Length: 33' 5" (10.19m)

Speed, Capacities and Weight

Water Capacity: 60 Gallons

Holding Tank: 18 Gallons

Fuel Capacity: 36 Gallons

Accommodations

Total Cabins: 3

Total Heads: 1

Hull and Deck Information

Hull Material: Fiberglass

Engine Information

Engines: 1

Manufacturer: Westerbeke

Model: 30B

Engine Type: Inboard

Fuel Type: Diesel

DETAILED INFORMATION

Accommodations

Accommodations feature the master queen cabin forward with two double cabins aft. The saloon has a U shaped settee with table that has adequate seating for owners and guests at deck level. The dinette easily converts into a berth for two. A large galley with opposing work surfaces also features a double sink, refrigerator, stove with oven and broiler, all with a view out the panoramic window. Forward to port is the head with counter space, washbasin and shower with an isolating door and two storage lockers. The cockpit is designed with comfortable seating with easy ingress and egress to the main salon. Molded in transom steps allows easy and safe access in and out of the water.

Build Information

The Gemini's 14' beam allows you to dock in a standard monohull slip or be trucked across the country. The proven design has seen improvements throughout the years. Her interior is warm, open, light and airy

The hulls of the Gemini 105Mc are shallow and shaped much like a "teardrop" which requires little force to move the 105Mc through the water while still allowing a high load carrying capacity and offer a performing, safe, stable platform

The bridge deck has 39" of clearance at the bow. This, combined with the lack of pitching and wave making, translates to a comfortable ride with no heeling

The entire hull mold is one complete unit including the centerboard cases. This single unit eliminates any secondary bonding down the keel, at the bridge deck or around the centerboard cases making for a rigid, faster, stronger, and more stable platform that provides excellent sailing performance

The lift-able asymmetrical centerboards provide plenty of 'grip' while going to windward yet are easily retractable. Sailing downwind, the boards are raised, thus minimizing drag and maximizing performance

The boards are molded with closed cell foam, which ensures they will last a lifetime. Each centerboard case has a Plexiglas cover enabling the operator to see whether they are up or down. Centerboards are operated from inside and will easily kick up if the boat is grounded

The boards extend 5' 6" in the down position and 18" when up

Electronics

- Raymarine GPS/Chartplotter and Radar
- Raymarine Autopilot
- Raymarine Tridata
