SPECIFICATIONS

Overview

The first and only (used) Sunreef Supreme Power to hit the US market.

Perhaps the most fun yacht on the water under 100', boasting a tremendously voluminous, open layout 4 Stateroom - 4 Head layout, which makes for an unparalleled entertaining oasis characterized by stable & efficient shallow water cruising.

The vessel has been privately owned and used by a single owner for trips to and from the Bahamas, with only 250 hours on the mains, this unique vessel has some highlights you'll be sure to love.

360 Degrees of Natural Sunlight - What differentiates the Supreme models through Sunreef from other power or sailing catamarans, is the fact that no matter where you stand on the main deck, you'll be able to take in the beautiful views around you. The floor to ceiling windows fully open up to allow you and your guests to move freely between the salon and main deck while allowing you to enjoy a lovely cross breeze. The shades on the forward windshield can also be electronically raised and lowered, making for a more seamless enjoyable time for your crew and your guests.

Open Layout - While real estate preferences have shifted towards that of the 'open concept', the inherent spatial limitations onboard a yacht, make this replication difficult, but this expansive interior unites the galley, dining area, salon, bar, helm and work station in a single, beautiful space. The current owner loves how he and his friends can play cards at the dinette capable of accommodating 12, within earshot of his wife and her friends as they converse in the galley, while the children play with their toys and watch tv from a beautiful u-shaped settee.

Massive Garage - Sunreef presents an owner the option of a massive garage or an extended hydraulic platform when building their catamarans. The current owner opted for the garage which currently stores a 2018 Williams 435 Jet Tender (14'3" ft) and up to 3 Sea Doo jet skis, which can simply be launched into the water by a single operator with the push of a button through the electronic dinghy launch system. There's plenty of room to spare as well for storing diving equipment, paddleboards, kayaks and fishing gear with room to spare as well. When the garage is fully extended, a full beam beach club makes it possible for you and your guests to sit right on top of the water.

Upgraded Volvo IPS - Power catamarans are gaining popularity for the simple fact that they are more spacious, stable and efficient than traditional monohulls, but the current owner chose to equip this lovely catamaran with Volvo 1050's, boasting 800 hp and a top speed of 24 knots. While moving quickly is always an option, the owner is happy cruising at 7 knots which results in a consumption of only 9 gallons/hour.

Flybridge & Bow - The exterior entertaining area of this Sunreef boats a beautiful teak flybridge, with a wetbar and sunpads, that served as the site of the launch party at the Sunreef shipyard in Gdansk, Poland. The current owner reminisces on how there were 64 people on the flybridge with more room to spare. On the main deck, you have additional sunpads with storage underneath them and just under the center sunpad, there's a jacuzzi setup, although the current owner opted to not line this at the time of build. While underway, the aerodynamics of the yacht are such that the typical splash and wind that irritate one on a traditional yacht, being over 10' above the water prevents spray and the wind travels above to the flybridge.

Aft Deck Reclining Sofa - The current owner saw an opportunity to enhance the aft deck of Sunreef's build by replacing the standalone rail with a reclining sofa, that allows you to comfortably enjoy the aft deck while underway. The salon television that folds out of the ceiling can also rotate 360 degrees so you can watch the game, a movie or footage of your family vacation.

Electric Versatility - If you reside in europe or plan on hosting european guests, whether privately or for charter, every stateroom as well as the galley and salon posses outlets that accomodate european and american electronics for seamless charging.

Additional Upgrades:

- Engines (D6 Volvo - 370HP to IPS 1050 - 800 HP)
- Electric Kit (US & Euro Power | Additional Inverter)
- Generator (13 to 27 KVA)
