SPECIFICATIONS

Overview

INDULGE is a great example of a yacht that has been well cared for. She was meticulously cared for by the prior owner that owned her for six years and is still operated under an open checkbook policy. While under the ownership of the prior owner the radar arch was removed and replaced with a radar/satellite mast that can be lowered to allow the vessel to pass under low lying fixed bridges. This modification makes this one of the only 80' yachts that can complete the Great Loop and many other hard to access locations. Just forward of the mast is a location where the jet skis can be stored by a Besenzoni davit a large dining table and multiple areas for relaxing in the sun.

The INDULGE has a 4 guest stateroom layout that includes a large full-beam Master Cabin with huge hull side windows. Aft of the engine room are the two crew cabins. Each crew cabin has two bunks. The interior of the INDULGE is in excellent condition and still shows like a new yacht.

A very nice option on the INDULGE is the huge swim platform and garage. This area is accessed by the set of transom stairs on either side. When the transom door is opened the garage is exposed and the swim platform is lowered to the water. The garage is large enough to store a small tender.

Recently completed:

All interior lighting converted to LED

Custom aft deck 8' x 3' teak dining table

new Linens and memory foam mattresses throughout the entire vessel

New Props, shaft seals and couplers and cutlass bearings

New Carpet throughout

New window shades

New Garmin MFD

Engine Information

Engines: 2

Manufacturer: MTU

Model: 12V2000CR

Engine Type: Inboard

Fuel Type: Diesel

DETAILED INFORMATION

DESCRIPTION

Evolution is the keyword that guides almost half a century of design and vision at Ferretti Yachts. Continuous research driven by innovation to create yachts that meet each owner's unique desires in terms of comfort, style, navigation and safety at sea. The most recent yacht created with this philosophy is the new Ferretti Yachts 780. This philosophy is also evident in the aerodynamic design, which is brought to life by the clean shapes and sleek lines, accentuated by the choice to resize the height of the hull's topsides to the benefit of the overall sporty character of the yacht. The aggressive look is enhanced by the separation between fiberglass elements and the glass surfaces. The hull design in particular takes the stylistic feature of the three windows corresponding to the guest cabins, from the new Ferretti Yachts 450 and 550. In the superstructure, we find the shapes of the over 80' flybridge yachts, which are added to the front and side section of the command station. An important innovation is the stern area, which offers the comforts of a real beach club with the new door operating system. Once the tailgate is fully opened, the space is transformed into a remarkable relaxing area close to the water. The shipyard offers the installation of a roll bar for satellite systems, which can be integrated by a modular hard top with a center awning or glass protection. Like the entire Ferretti Yachts fleet, the new 78-foot will be available in the version Tai He Ban. This design philosophy captivated audiences and critics in all Asia Pacific markets.

EXTRA EQUIPMENT FEATURES

- Four Underwater Light Fixtures in Transom
- Two Underwater Light Fixtures Under Master Cabin Windows
- Settee on Flybridge with Storage Under
- Two Integrated Sun Pads on Flybridge
- Electric High / Low Television Cabinet in Main Salon
