DETAILED INFORMATION

Company History

We at Motion would like to thank you for taking this time to visit with us and get acquainted with our product line. We are a company that has been producing national and world championship boats now for more than a decade. With all the years of racing under our belts and dedication to research and development, we know what it takes to build a perfect high performance boat. Our boats are better handling and offer a smoother operation than the competition. Let the ride decide.

At Motion, we spend countless hours finessing the weight balance on all our boats. The perfect balance on a hull will require less effort to propel it through the water for optimum performance whether in smooth water or rough water conditions. It also creates less demand on your drive train that equals to more longevity. We truly build a true offshore cat and our new 42' SF Deep V models that can handle the rigors of what Mother Nature can throw at you. You won't need to pick your boating days any longer.

Exclusions

Owner's personal belongings.
