SPECIFICATIONS

Overview

The Delta Carbon 54 from Sweden was, at the time of launch the world's largest production boat built in carbon. Ideal for day trips but with an impressive range due to her being able to run with smaller engines due to the light boat construction and good fuel capacity due to her size. Actual construction is vacuum infused carbon fiber/divinylcell/vinylester. Range is 500NM which is very impressive for this size of yacht and really opens up new possibilities when planning your days out. She is powered by twin Volvo IPS 600 435hp with joystick control so is a breeze to operate and will do a top speed of 30knots and a cruises all day at 22 knots. She is the galley down version to allow the main deck saloon to be primarily for relaxing and entertaining. The galley is situated in the port midship cabin which still has room for one berth suitable for a captain. Recently fitted with a larger 20kw genset and a Seakeeper 9 gyro stabilizer for added comfort at anchor there is very little you would need to do to this boat to improve her at all. Thai registered and VAT paid. One owner from new the boat is in excellent condition and has been maintained to a very high standard. This boat is seriously for sale and inspections are encouraged.

- # Lightweight carbon construction hull and deck
- # Twin Volvo IPS 600 435hp pod drives with joystick control
- # New Kohler 20kw fitted 2016
