Overview

"BABE" is not your typical motor yacht. She has been set up for long term cruising and offers all the luxury and accommodations needed for cruising or living aboard. Her highly efficient Volvo diesels engine propel her easily at 8.25 knots while only burning 4.6 gph. That yields better than 1000 nautical miles on a fill. Now consider that she has a huge house battery bank working in conjunction with a 3000 watt inverter and 840 watts of solar with a high end http solar controller and you have one very efficient vessel. Now lets add a 900 gallon per day water maker. So how long can we sit in the Bahamas without starting the generator? The real answer is that you will run the gen about an hour and a half a day. That gives you the generator time required to do the laundry in the stacked washer and dryer, to make the water used the previous day, add some amps to the batteries and create hot water. But best of all is having a solid fiberglass hull that rides great and has excellent balance. Docking this boat is no chore. With her excellent design and balance and a powerful bow thruster you will be docking this boat like a pro very quickly.

Too many highlights to list. Please review the listing details.

"BABE" is broker owned and operated.
