Model: D-20

Engine Type: Sail Drive

Fuel Type: Diesel

DETAILED INFORMATION

Features

Tartan 101 - WAVELENGTH - Highlights

The Tartan 101 is an ideal Racer / Cruiser. She has a modern hull form with bulb keel. Asymmetric sprit / Spinnaker for short-handed performance sailing. AND a modest interior with a functional layout and standing headroom.

WAVELENGTH was custom configured for an owner for weekending and club racing. Mission accomplished, this is a great platform, well thought out and equipped right of the task at hand!

Custom features completed by Tartan include

- Wheel steering with Carbon 60" Wheel
- Custom Forward Cabin Storage Locker / Doors
- Bulkhead Mounted Salon Table
- Dodger

Owner spent over 20k at Tartan factory optimizing details for performance cruising / racing.

Tartan 101 Overview

The 101 hull is designed to maximize overall performance without trending to any extreme, creating a boat that offers exhilarating performance on all points of sail. Her nearly 11-foot beam offers excellent form stability and in conjunction with the 6'6" bulbed lead keel provides the stiffness to support a sail area to displacement ratio of 25.8. With a BPA modified epoxy infused hull and deck, optimized uni-directional e-glass laminates, and synthetic hull coring, the 101 is the stiffest, lightest and strongest hull structure available in her size range amongst production builders. The 101 features a fractional carbon fiber mast, carbon fiber rudder post and retractable carbon fiber bow sprit. Co-engineered by SP Systems, the world leader in composite engineering and materials technology, the mast section is optimized to the 101 with careful attention paid to minimize weight aloft. The 101's carbon fiber mast is built using prepreg carbon fiber in aluminum tooling, and autoclave cured at temperatures of up to 250 degrees F and 100 psi. This yields a mast that weighs less than half of a comparable aluminum spar, yet is stronger and stiffer. With swept back spreaders led outboard to the hull sides, the 101 offers an impressive 671 square feet of upwind sail area without the hassle of large overlapping headsails. The retractable carbon fiber bow sprit and masthead asymmetrical spinnakers ensure exhilarating off wind performance while making the sailplan easily manageable when cruising or shorthanded. Rakish deck designs have undergone a modern update on the 101. A nearly 12' long cockpit provides plenty of working room for the crew. Molded braces provide secure seating for the driver and main trimmer located well clear of jib trimmers and forward crew. For the first time ever, the 101 features a molded carbon fiber and composite tiller as standard equipment, providing the ultimate feedback and feel to the helmsman. When she is not on the

racecourse, the forward end of the cockpit features molded cockpit seats and deep coamings that provide secure, comfortable seating in all conditions. Below decks, the 101 offers refined luxury in line with her pedigree. Lightweight composite components combined with varnished cherry cabinetry and laminated curved trims provide a spacious and comfortable interior while minimizing weight. Bulkheads are attached to hull, deck and interior components using engineered adhesives and epoxy resins; adding stiffness to the hull structure without adding weight. Accommodations for six are available in the forward double cabin, twin aft quarter berths and main cabin settee. The nav station to starboard accommodates full navigation and electrical instrumentation with a full-size chart table as an excellent working surface. The galley to port is fit with a two burner stove, large insulated icebox and deep stainless steel sink. Just forward of the main bulkhead is a large head with lightweight composite construction and molded in sink. Aerospace quality composites, modern construction techniques and careful attention to detail afford the 101 with an interior arrangement that belies her performance capabilities.

Interior Highlights

The Tartan 101 has an open floorplan. Double Fee Bunk forward. Modest Head w/ Sink. Large Open Salon with port and starboard settees. The settee backs remove and fix inboard for lee boards or sailing storage cubbies. Nav station is in front of the starboard aft bunk and galley is in front of the port side aft bunk.

This interior feels large for a 33 footer with a 12 cockpit. AND she has 6' standing headroom.

Wavelength has the optional Cherry Interior w/ a solid teak cabin sole.

She also has a custom Salon table which hinges off the Starboard main bulkhead. The table stores on the bulkhead and can comrade 3 or 5 dining! with a drop leaf

Custom Interior Options on Wavelength

- Cherry Interior
- Bulkhead stored Salon Table
- Additional Storage locker s/ doors forward
- Additional Storage doors aft at galley
