## Overview

The ICE Cat 61 was a breakthrough in the catamaran design. She is born of Engineer Enrico Contreas, father of the legendary catamaran Mattia and one of the most experienced designers of catamarans.

This has guaranteed the planning and development of a new generation of catamarans. A new multi-hull with slick lines, born from a modern redesign of the legendary Mattia 56 "Sbandato" who surprised everyone with her speed and handling and became immediately a reference point in the catamaran design.

The lines do not follow the recent trends. Her smart design guarantees the perfect form-function combination. For example, the bows are not too inclined, in order to be able to recover mooring without problem. It is a fast cruising boat, but still comfortable. Everything is at the right place for comfort.
