- Freeboard fwd 4'8", freeboard aft
- Docklines and fenders
- Boat hooks
- Multiple canvas cover jerry jugs
- (3) Fire extinguishers
- USCG safety package

Hull & Construction

Endless is a forty-three (43) foot fiberglass sailboat designed by Nelson Marek and built by

Morgan Marine in 1985. These vessels are popular and well thought of yacht that generally have a reputation of being well built and nicely finished. The hull is of the round bilge, modified keel, displacement form. The vessel is constructed of conventional fiberglass reinforced plastic (FRP). The hull is a reinforced fiberglass molding; hand laid up, using unidirectional fabrics with resin and stiffened with “glassed” in bulkheads, structural members, joinery flanges, and fittings. The deck structure is a single unit and was molded using layers of woven roving and mat in an unverified core construction.
