General Description

“Shallow Minded”

2011 Gemini 105Mc

If you are looking for a pocket catamaran that will perform in open water and delivers the ability to “gunk hole” than you are looking for “Shallow Minded”.

The Gemini 105Mc is a great design that allows just that. With its minimum draft of 1’6” to a maximum of 5’6” – when the centerboards are down. This boat has a 14’ beam that supplies a steady, stable sailing experience and an abundance of living space below.

The hardcover cockpit with its starboard bulkhead helm, large storage lockers and molded benches and steps provides an accessible, safe and comfortable area to sail this vessel. The aft steps, on each hull, allows easy access to the davit hung tender and makes easily boarding the vessel possible

The Inboard/outboard center drive Westerbeke 27hps diesel engine pushes “Shallow Minded” with ease.

A full main with lazy jacks and a 150% genoa provides the power behind the sailing power of this vessel. The electrical windless with chained ground tackle delivers the holding strength need when anchoring.

Entering the cabin, which is on the same level, presents a large settee that center table can be

removed to make a relaxing lounging pit or drop the table down to make a double size berth. The chart table is to the right with the side loading refrigerator/freezer unit and the boat's electrical panel is the left which is located above a padded seat.

Stepping down into the port hull, heading aft is a double berth cabin, heading forward is the enclosed marine head with as stainless-steel sink. Proceeding across the salon to the starboard and down the step is the galley, 2 burner propane stove/oven and a covered double sink. Heading toward the bow is the captain's quarter with the queen-size berth, at the other end of this hull is another double berth cabin.

The cabin is keeps cool with a Cabin top air conditioner.

Broker notes:

The 2001 Gemini 105 Mc Catamaran is a sought after model. The rigging, sails, engine and hull are all in fine condition. This one is worth the time to see. Professionally detailed and ready to go. It with it's 9.5" tender is design for adventure.
