SPECIFICATIONS

Overview

- Hulls Built 1995 Farr Design with Deck and interior removed for new build to Buyers Specifications
- Deck molds reconfigured to new Racer / Cruiser Design
- The design brief for this 85 feet High Performance Yacht build is to construct a “Grand Cruiser Racer”.
- This requires a combination between a very fast hull providing high average daily runs (300miles +) and a ultra stylish interior which is seaworthy and durable. The yacht shall be able to cross the oceans in comfort. The Yacht will be build at “Safirjahte D.O.O.” in Slovenia. The builders are known for high quality yacht builds, retrofits, and carbon construction. Thus the deciding factors for a good Sailing Yacht. Weight and carbon structure are critical during the build process. With a designed weight of 40 tons she weights in at a moderate displacement for comfortable sailing. The asking price is for a ready to sail vessel – including all parts and pieces , safety gear etc... This is a very attractive package for a performance oriented buyer/owner with personal customization.

Basic Information

Category: Deck Saloon

Model Year: 2020
