# DETAILED INFORMATION

## Dave Pascoe-Yachtsurvey.com comment

A good boat built the way a good boat should be built. A near perfect meld between strength, durability, weight and performance. This design has been perfected over a lot of years and there's little room left for improvement. Maintenance wise, its about as easy and low budget as it gets. If you're looking for a tried and true winner, this is it. A new one fitted out like this goes out the door for over a million bucks. You can pick one of these up for a quarter that price, or less. You won't find another production boat any sweeter than this honey.
