Overview

H70 is a brand new power catamaran currently under construction at BKC and built in the spirit of her already launched sister ship, H65. H70 is a 21.51m luxury explorer power catamaran that is designed for ocean crossing in high comfort.

The H70 project was initially designed for an owner wanting to launch a charter fleet of three high-end power catamarans. The brief was 'no compromise' on guest comfort and spacious living areas both inside and out. The hull design makes for an extremely seaworthy vessel and trans-oceanic capabilities. H70 would make an ideal yacht for family cruising or circumnavigation in high safety and comfort, or she could be a double season charter yacht delivering a profitable revenue.

BKC shipyard was selected for the build for the H70 due to its expertise in luxury trans-oceanic yachts that are finished to a very high standard.

Similar to her sister-ship, the H65 that has already been delivered, the H70 is graced with elegant exterior lines. Her slim hulls cut through ocean waves and optimize speed in any sea condition. The H70 also has two further sister ships under project, the H80 and H115.

In terms of exterior decks, the H70 boasts stand-out attributes: an incredible 52 square metre flybridge, plus bow and stern cockpits that deliver over 100 square metres of outdoor space. The vast flybridge has 360-degree views and is fully sheltered by a hard top bimini. The forward cockpit is ideal for relaxing when at anchor, taking in the panoramic view and a refreshing breeze. The stern cockpit offers privacy and a location more sheltered from both the sun and wind, extended by its 8sq.m stern sunbed over the water.

When it comes to the interior, this project enables a new owner to configure the design to his or her requirements and select the materials throughout. One configuration could be two master cabins forward, one in either hull, and two double guest cabins at the stern, plus a crew cabin for two.

Great attention has been paid to the potential for socialising and sporting activities - not only does the H70 offer the possibility of a Jacuzzi and outdoor bar, but also a beach club, swim & diving platforms and several locations to store an extensive selection of water toys. An additional toy garage could even be created in the bow.

This turnkey project is a superb opportunity for a new owner to totally customize a luxury power catamaran and create the explorer they have always dreamed of, within an attractive budget.

Basic Information

Category: Motor Yacht

Model Year: 2020

Year Built: 2020

Country: Thailand
