## Construction

---

This yacht is constructed with the most modern materials and techniques providing more strength with less weight than possible with conventional technology. The use of Kevlar,

modified epoxy resins, and high-density core materials allows the Marlow Explorer to be stronger than the heaviest of hulls at a fraction of the weight. Modern honeycomb and structural foam

are used on every counter, cabinet and sole in the yacht. Even if speed is not a driving factor for you, the increased range and reduced fuel costs will be of great benefit.

## Engine and Mechanical

---

The engine room has full standup headroom and is air-conditioned. There is good access to all sides of the engines. The sea chest is at the forward end of the engine room and provides sea water to the engines, generator, air-conditioning, and all the other items on the yacht that need sea water for cooling. Each item has its own shut-off valve for servicing. The two 1,500 gallon fuel tanks are just in front of the forward engine room bulkhead. This is the center of buoyancy of the yacht so your running angle will not change as your fuel level changes. The fuel tanks also provide an additional layer of soundproofing between the engines and the cabins forward.
