## Overview

---

Galeon's entry level model dubbed the 300 FLY joined the third generation lineup in the late spring of 2014. This compact-sized flybridge was designed from scratch to offer great handling and stability in all weather conditions. Both the hull and deck are made using the infusion technology which helps in minimizing the weight, enhancing the craft's performance and fuel consumption.

The dynamic exterior clearly follows the design trend outlined by the third generation of Galeon Yachts range with its broad windows and edgy features. The top deck is easily accessed by built in wide steps and features a steering station with a convertible bench that extends the large sundeck area even further.

The passengers will surely make use of the conveniently planned cockpit which will be available with either a fixed bench or a fold-out seating – perfect for sunbathing. The main deck is occupied by a sizable dinette and an opposite facing galley with the helm station moved forward.

The interior finish is available in several distinct designs including oak and walnut, with plenty of customization options at the client's disposal. Down below, two double standing height cabins and a bathroom complete with a head and a shower await the guests. Both single and twin petrol or diesel engine installations are available.
