DETAILED INFORMATION

Manufacturer Provided Description

The S Collection blends a sporty look with elegance thanks to innovative high-tech solutions and high-performance materials for desirable, technological yachts. The stylistic high point of the collection is the dynamic bow cap while aboard, the huge open spaces create a sense of constant dialogue between the interior and exterior for unrivaled comfort and luxury.

Carbon-tech Generation

The use of carbon fiber is a construction choice that allows volumes and surfaces to be increased in size while keeping the same weight, therefore maintaining excellent levels of dynamic stability.

Carbon fiber lamination is applied to:

- Superstructure
- Flybridge
- Mast
- Transom/platform

Triple IPS Propulsion

Triple Volvo IPS propulsion system installed on hydrodynamically optimized hull shape

- Superior maneuverability
- Minimum noise and vibration level
- Best fuel efficiency (up to 25% reduction compared to shaft line)

Active Trim Control

Interceptor technology provides a smooth, precise Auto mode that automatically takes care of all trim adjustments. It delivers trouble-free handling and a system without corrosion or leaking oil.

NAVIOP Advanced Monitoring System

State-of-the-art solution for displaying and controlling main onboard systems: engine data, fuel consumption, generators, trim, interceptor, navigation lights, batteries, air conditioning.

Aft Pivoting Platform and Garage

Innovative mechanism. Large beach area, garage for 385 tender and jet ski, easy launch mechanism.

HTS High Technical Standard Declaration

Azimut 77S has been designed and engineered according to the highest standards applied in the recreational industry for production boats. With CE Class A and NMMA Certification, the boat is in compliance with the two major safety codes for boats under 24 meters.

Joystick Driving

Joystick Driving offers an easy way to maneuver with precision and at the same time, it allows the driver to steer comfortably at all speeds with only one hand. When Joystick Driving is activated, the Autopilot turns on simultaneously. The driver steers the boat by moving the Joystick. When the Joystick is released, the Autopilot is engaged and keeps a forward course.
