Hull Material: Fiberglass Sandwich

Hull Configuration: Planing

Engine Information

Engines: 3

Manufacturer: Volvo Penta

Engine Type: Inboard

Fuel Type: Diesel

DETAILED INFORMATION

ALL IN

The new and improved APEX 60 is a luxury day tender offering a unique combination of performance, comfort, and elegance. Some upgrades included increased max speed, sleeker exteriors and more ergonomic spaces. The newly designed interiors can comfortably accommodate 4 guests and 2 crew members for an overnight stay on the water. The sleek and aggressively sporting exterior lines convey an understated aesthetic, while the fibreglass and composite hull and the reduced noise & vibration of the Volvo Penta IPS engines deliver the smoothest rides. Traditional teak decking accentuates the ultra-modern design of the furniture and fittings that follow the principles of both form and function. The stern provides unobstructed access to the boat and a large sunbed covering storage boxes containing all the necessary switches, sockets and docking station. A flexible dining and lounge area includes an adjustable height table and beautifully upholstered sofas with built-in storage. The multi-functional kitchenette can also be covered to provide extra seating for guests or a rest for the Captain while piloting the boat. A comfortable walkaround with built-in carbon railings provides safe movement at all times and easy access to the bow of the boat, and its huge sunbed area for all-day lounging and enjoying the thrill of riding across the waves. APEX 60 has been specifically designed to be a flexible day tender, equally equipped for a full day out exploring the coastline or a fun party boat. Luxurious, functional and very stylish, are the words that best describe the interior of APEX 60. A spacious layout of the interior comprises a generous and comfortable salon with fully equipped galley, guest toilet, plenty of storage and a beautifully appointed Owner's cabin with flexible seating and sleeping area in a very private space. The peak of style and functionality is the Owner's bathroom, fit with a separate shower and all you need to get ready and step back on shore. The APEX 60 is at heart a high-performance craft with x3 Volvo Penta IPS (Inboard Propulsion System) engines delivering faster acceleration and higher speeds, up to a maximum of 41 knots. The joystick controls and POD drive propulsion provide greater handling responsiveness and increased manoeuvrability to make docking easier and safer. In addition, the engines offer significantly reduced fuel consumption while also improving the overall cruising range. Reduced noise and vibration coupled with exhaust gases directed out through the drive units underwater make for an overall superior experience. The PLC (programmable logic controller) system by Allen-Bradley has a waterproof touchscreen interface installed in the wheelhouse. It allows for automatic and manual management of the electro-mechanical system as well as the physical parameters.

DESIGN FEATURES -Fully automatic stern boarding passarelle / stepladder that can be inclined up to 45 degrees upwards and downwards. -Removable carbon standing shower pole on deck with automated water connection. -Kitchenette fully equipped with fridge, ice maker, teppanyaki hot plate, sink and ample storage. -Separate hardware back-up for main system controls. -Hardtop with integrated photovoltaic panels for charging and maintenance of service batteries. -

Submarine anchor. -Optional extra solar shade for rear sunbed.

Exclusions

Owner's personal belongings.
