SPECIFICATIONS

Overview

This 37' Cobalt is the perfect solution for a Lake cruiser or ready and comfortable to cruise comfortably through the San Juan Islands. Whether it is for a weekend or a week long cruise you will appreciate all of the comfort features this boat comes with. It is a very well built boat with lots of dock appeal and with the Axius system it can be maneuvered with a joystick for the ultimate in controllability. This boat still turns heads as she comes into port. The hard top is not only good looking but very solid to protect the cockpit from heavy weather. This boat has had new drives installed recently and is ready for spring. Make time to see this one a priority as it will not be available for long. If you like quality and high end yacht finishes then mark this one on your list of boats to see!

Basic Information

Category: Cruiser

Sub Category: Express

Accommodations

Total Cabins: 2

Total Heads: 1

Hull and Deck Information

Hull Material: Fiberglass

Engine Information

Engines: 2

Manufacturer: Mercruiser

Model: 496 HO

Fuel Type: Gas/Petrol

DETAILED INFORMATION

Manufacturer Provided Description

With all the creature comforts of far larger boats, accented by megayacht-standard custom cabinetry, the 37 makes every best possible use of interior space. Case in point: the two full beds with conventional mattresses in lieu of the convertible cushions of a settee that other manufacturers term a "midberth." A solid panel secludes the master stateroom, opening and airing the cabin. The overall efficiency and roominess of interior spaces arise in large part from Cobalt's willingness to use multiple, complex molds in the fabrication of parts, leading to designs simply not possible to manufacturers restricted by their insistence on simple, unimaginative molding. Designed and engineered to exacting specifications for open water performance and saltwater durability, the 37 has been built ready to take on the traffic in coastal waters and inland lakes alike. Where competitors are quick to speak of "value-added engineering," a euphemism for the subtraction of the very best materials from a boat's construction in an effort to keep costs down, Cobalt has beefed the 37's design, calling for high technology in both materials and their application. The full-length stringer system has been reinforced with carbon fiber, laid up with vinyl ester resins, the solid fiberglass, Kevlar- strengthened hull bottom a full three-quarter inches thick. The structural bulkheads, of total composite construction, are vacuum-infused. Whalebones compound overall sturdiness.

Engines

The drives and transom assemblies were replaced with new ones in the fall of 2020 so this is going to be like starting with new running gear. The entire mechanical portion of this boat will impress you when you review the records. Full tune up on engines and oil change.

Exterior Hull

Bottom paint completed in August 2020 New underwater lights installed August 2020 Buff hull and wax August 2020
