## Overview

---

RIB10-12 fit a 24l fuel tank in the bow locker. RIB LITE are weight optimized without bow locker or flat double flooring.

As optional equipment there are steering consoles and double seating (starting from RIB10 and only for DL). You can also choose from a variety of sunroofs, bilge pumps, cushions and many more things. Please ask your ZAR mini™ dealer. He can serve you best.

The ZAR mini™ RIB line can easily pull water toys and tubes with the two installed D-rings on the transom.

Every ZAR mini™ has 3 lifting Davit lifting points. One in the bow and two at the transom. If your ZAR mini™ has a bow locker (DL version), you will have four lifting points.

Due to the very light aluminum hull it can go very fast and plan easily with a smaller engine. The hull will not face any problems like a fiberglass hull. It will also last longer and not become heavier during use. The hull are made of special aluminium and powder coated to resist corrosion and saltwater. You will have a lot of fun with your ZAR mini™ RIB.

All ZAR mini™ RIB inflatables are also available in CSM (formally known as Hypalon™ from DuPont™) with a special design. Please ask your ZAR mini™ dealer, for further details. CSM lasts much longer than PVC and is more resistant toward UV light, acid, alkalis, saltwater, heat and cold. We use Hypatex™ that is one on the best material on the world market today. It has been manufactured since 60 years.

All PVC seams of our ZAR mini™ tube chambers are welded\*. All boats feature an overpressure valve, as standard equipment, that will protect your tube when inflated properly. High quality material's paired with constant research & development are the key to success.

Every single ZAR mini™ inflatable boat passes a very strict quality control, before we deliver it to our valued customers. Just in case a mistake passes the quality control, you will be protected by our limited warranty after registering your boat with us.
