## Overview

---

The Riviera 45 Flybridge Series II is a wonderful flybridge design offering big-boat features in a manageable size. The 45 Riviera Series II offers stairs to the flybridge, a comfortable three-stateroom, two-head layout, and unique features including mezzanine seating, hullside windows, and Riviera's signature hopper flip-up aft bulkhead window. We are excited to introduce you to this concept in family boating.

# DETAILED INFORMATION

---

## Manufacturer Provided Description

---

Anyone considering the purchase of a luxury pleasure boat has developed certain lifestyle standards and an aversion to compromise. If you relate to this, welcome to the world of Riviera and in particular welcome aboard the 45 Open Flybridge. Over more than 27 years, Riviera has grown to become a major international force in luxury pleasure craft. Decades of building thousands of Flybridge Convertibles and a philosophy of constant refining and innovation has fashioned a new vessel that offers an extraordinary combination of comfort, performance, reliability, safety and value. The 45 features fully molded steps complete with teak treads and a storage locker underneath. The rear bulkhead window and door open out into the cockpit to create one living space between the saloon and galley. The saloon is one integrated space, with the large galley just one small step down from the saloon. Weve included an electrically operated overhead locker in the saloon headliner for safe and convenient rod storage and, thanks to the most advanced robotic varnishing facility in Australia, the finish on the timberwork is both impeccable and astonishingly durable. There is no one feature that makes the 45 such a remarkable boat, it is the combination of hundreds of features. Some of these are major features, like propeller tunnels that provide greater forward thrust and an underwater exhaust system that minimizes engine noise and fumes. Others are small but contribute much to the overall appeal of the 45. One example is the recessed cleats in the aft corners of the cockpit with their optional clip-on covers; a design that creates a smooth profile and prevents fishing lines getting caught. The computer aided hull design is certainly one of the major features. This is largely responsible for the exceptional hydrodynamics: quick to plane, stable yet delightfully responsive, and truly robust. You will also note the engine room is a very open and functional space. This is the result of creating a separate pump room that houses air-conditioning compressors, fresh water pumps and other associated equipment. This compartment is accessed via the portside guest cabin and aids maintenance accessibility. In the world of mid-sized luxury flybridges, this is the boat that raises the bar; this is the boat that says yes, you can have it all.

## Exclusions

---

Owner's personal belongings.
