## Overview

---

The Hampton 630 Skylounge Motoryacht is a result of 150 years of boat building expertise by one of the finest Yacht builders in the world. This recent new design reflects the uncompromising commitment to extraordinary design, construction, safety and value.

Hampton uses the highest quality of rich satin with gloss burl trim furniture, Hampton Yachts craftsmen have painstakingly joined each piece that result in flawless corners, carefully carved from solid wood, not just laminations. The uncompromising woodwork is what Hampton owners have come to expect.... in short quality that you can see, touch and feel.

Hampton offers superior quality above world class standards, that means as a start each Hampton 630 is a 100% hand laid one-piece fiberglass hull that features solid fiberglass below the waterline with three outer layers of vinylester resin to prevent blisters and Kevlar is added to the collision zone for strength. The sharply veed forward hull sections give the 630 a soft and dry ride, while the flattened lines aft add to the stability as well as the efficiency for superior fuel economy. Propeller tunnels are used to level the engines, add directional stability, and allow shallow water adventuring.

When at the helm in the Hampton 630 Skylounge, there is a choice of the latest navigation and communication electronics in the sweeping instrument panel with every feature needed for easy piloting including dual thrusters and cameras for monitoring the engine room and the aft areas of the boat. A comfortable settee with a beautiful burl inlayed table allows your family and friends to keep you company and with wet bar and flat screen TV it's one the favorite areas of the yacht. Congregating in the Skylounge you have discovered one of the reasons that the Hampton 630 is the perfect jaw dropping stunning yacht for those seeking quality and comfort. When the weather is chilly or wet, the Skylounge is super comfortable while in warm weather it remains an air-conditioned respite. From mid ship through aircraft-style stainless steel doors lead to the wide side decks with high bulwarks for peace of mind. This is truly a yacht for all seasons and all reasons.

This 630 has a three stateroom 2 head layout that take full advantage of the generous eighteen foot beam, design flexibility has always been a feature of every Hampton yacht and this owner has maximized the best in interior layout with the finest appointments. These include a full beam master stateroom with full beam his and her heads and centered shower in between them. The doorways are comfortably wide, the stairwells gentle and spacious, and even the seating is carefully designed for comfort. As an example the dining settee is oversized for comfortable relaxed gathering.

For absolute reliability, everything on the Hampton 630 from the powerful diesels right

down to the electrical wall switches can be easily maintained, with readily available parts as well as service. This vessel has the upgraded engine package that includes the C18 Acert Caterpillar engines.

This Hampton offers a long list of equipment. Major items like the Wesmar stabilizers, generator, bow thruster, air conditioning, full electronics package, entertainment system, full galley appliances, central vacuum system, and rich satin finish interior are all included with each Hampton 630 from the factory. A custom designed helm that added more square footage to the living space of the Skylounge and improved the sightlines over the bow considerably, very high end Pompanette seating in the Skylounge, multiple satellite receivers dedicated to each area of the boat, extra generator just to mention a few.

To really see the quality built into each Hampton 630 you have to look at the details. Amazingly every possible extra foot of space has been converted into useful storage because we all know there is never enough storage on a yacht. Explore the engine room, and you will find that the wiring is neatly loomed and color-coded, that all the maintenance areas are easily accessible, and every pipe has a label at each valve. Look around the decks and you will see properly placed and sized scuppers. Wrap your hands around the oversized deck rails and feel the strength of the beautifully welded and polished 316 stainless steel. With no exposed wood on the exterior, the Hampton 630 is as easy to maintain as she is to handle.

Whether your interest is safe and comfortable passage-making, harbor-hopping along the coast or living aboard, the people at Hampton Yachts and this owner have created a stunning custom Hampton 630 Skylounge Motoryacht.....there is no equal being built that incorporates, quality, safety and fit and finish.
