SALON ARRANGEMENT

LOWER DECK

53' CONVERTIBLE

In the 1700s in the small town of Lunenburg, N.S., John Cavileer was building a boat crafted to the highest standards. Local legend has it that a Revolutionary War general named George Washington was so impressed with the Cavileer's construction that he used it to cross the Delaware. Of course, George Washington would go on to become President of the United States while John Cavileer would set the pace of excellence in boatbuilding. His principles of quality craftsmanship and superior service have now become the benchmark by which modern day boatbuilders are judged. Cavileer's commitment to his boat was so great that when visiting the factory, you'll notice that he still watches over his boat building legacy — in his final resting place in on the company grounds.

Today, at the helm of Cavileer are John and Chip DeNante — who personally select only the finest materials that go into each Cavileer. Even the vinyl-ester resin in their solid fiberglass process, imported balun tank in their world renowned paint work, and finishing touches like Fish-Gone refrigeration in their rickety appointed interiors.

Over 200 years after Washington crossed the Delaware, the Cavileer legend continues...
