SPECIFICATIONS

Overview

The precision-engineered hull construction of each Protector model fills the Captain with confidence to go anywhere in safety and comfort. Each hull is solid hand-laid fiberglass using 24-ounce roven woving layers, building up until the hull is three-quarters-of-an-inch thick on the sides and one-and-a-half-inches thick at the keel.

This approach uses proven and reliable construction techniques, and Protector has had no hull failures since its first hull was produced in 1999. The rugged hull is surrounded by an inflatable Hypalon collar with seven baffled air chambers, this provides a suspension like effect, absorbing energy and reducing the feel of pounding into the waves. Go ahead. Go anywhere.

Basic Information

Category: Boats

Sub Category: Inflatable

Model Year: 2015
