SPECIFICATIONS

Overview

A market disrupter that will be powered by 100% renewable energy. No fuel stops, no greenhouse gases, just pure fun, clean sailing.

AQUON ONE is an intelligent catamaran with eco-friendly innovation at its core. Designed by Christian Grande and built by Latitude Yachts, she will be the first series of power catamarans built for pure independence.

The AQUON ONE model is 20.72m (68') in length and will be powered by a solar-hydrogen propulsion system. Solar energy will be generated by the yacht's photovoltaic panels, that will convert desalinated water into hydrogen and in turn power two electric engines. The result is non-stop silent and emission-free cruising for you and the family.

AQUON ONE packs a punch, with 250sqm of living space onboard. Her design is an exquisite synergy between her living spaces and the natural world, which create a harmonious environment from which to relax and unwind. With a choice of cabin configurations and an exceptional roster of considered design features, AQUON ONE will be your home away from home.

No diesel generator on board. No smell. No noise. Unlimited cruising - also during night.
