## Overview

---

Curvelle Quaranta is the manifestation of an ambitious project of naval architects, designers and engineers from the UK, Australia and Netherlands.

A unique concept that combines the best features of both a superyacht and a power catamaran. It brings together the advantages of both types of boats into one unique design.

The double hull configuration (constructed of carbon fibre and epoxy) provides the stability and abundance of space you'd expect from a much longer yacht. In terms of stability, it's an interesting fact that the combination of twin hull configuration and use of the NAIAD stabilisation system has resulted in zero reported instances of guests ever getting sea-sick.

Her six convertible cabins are her signature feature. And such a feature allows you to personalize and customize her layout based on the needs of you, your guests, and your itinerary. All cabins are en-suite and have been inspired by and modelled after luxury cruise ships. And every room is equally flooded in natural light and wonderful views can be seen through her large panoramic windows (which are 2.7m by 0.9m wide).

Another interesting point is that Curvelle Quaranta was built to the highest safety standards: RINA Classification MCA-LY2. A form of commercial classification denoting "excellence behind excellence."
