SPECIFICATIONS

Overview

This 42 Power Catamaran was designed by Simonis-Voogd with solar / electrification as a future option. The narrower hulls and less wetted surface area below the waterline allow the boat to reach a top speed of 25+ knots, maintaining exceptional fuel efficiency. Her large fly-bridge offers 360 views, making navigation easy and safe. Ample seating-service area is available for barbeque and refreshments, which lends itself to executive entertainment. The interior/exterior has a functional open plan layout with the galley servicing saloon as well as cockpit area via stacking doors. She comfortably seats (16) people on both upper and lower levels. All 4 double cabins are spacious and user friendly. The light blonde interior (GISATEX) shows well throughout the boat, adding to the feeling of ample space. The stepped hull design gives maximum interior volume. She has been built and equipped with Safety equipment and operational standards normally applicable to a coastal passenger vessel. She has successfully undergone impact and stability tests for up to 40 people. She is currently equipped with safety equipment for 16 people.
