SPECIFICATIONS

Overview

Nova Luxe, the leader in power catamaran electric re-fits, brings you Elight 50 (GE) model as an electric hybrid new build. The “GE” stands for Generator Electric. This is our full electric hybrid model which uses two 100kW electric motors to propel the yacht silently. A single 25kW (or double available) generator ensures you always have power when you need it. Unlike a full diesel, this yacht can cruise silently as electric all day. The 10kW solar array provides ample power to run the house load for a 24 hour period. Freedom from a generator while at anchor. In practical use, you could spend several days at an island, then use the power you stored to travel an additional 10-40 miles to the next island. Leave the diesel in the tank and travel on green energy.

The world is a beautiful place; Nova Luxe Yachts strives to keep it that way by not polluting.

Basic Information

Category: Catamaran	Model Year: 2023
