SPECIFICATIONS

Overview

German shipyard SAY Carbon Yachts impresses with this “supercar on the water”: discover a new cabin and bathroom design on board this 2023 model, as well as new upholstery of the sunbathing areas. SAY Carbon Yachts has designed a new hull in colour “Ibiza Blue” in cooperation with Petestep® that makes the SAY 42 even faster and at the same time more efficient: 50 knots top speed with the Twin Ultra-Low Emission V8 Volvo Penta engines (860HP) in just a few seconds! The SAY 42 weighs only 4.5 tonnes including the Seakeeper 2 Gyro. The main advantages of this low weight are unbeatable acceleration and low fuel consumption at 20 knots: 45 litres / hour. A SAY yacht is not only built using the latest technology, it is also equipped with it. Enjoy modern boating and control and navigate comfortably via the large 16 inch Garmin plotters. For a swing-free anchorage, the SAY 42 is equipped with a battery-powered Seakeeper 2 Gyro. The total of 12 guests on board can enjoy the large sunbathing areas. At the touch of a button, the large table with exposed carbon details can be lowered. In a few easy steps, the seat cushions can be folded down and you have another cosy lounge. 2 mobile biminis provide shade in the cockpit as well as the entire sunbathing area – and you can still enjoy the unobstructed panoramic view. Under the seating area is a storage space for all water toys and in the engine compartment, there is space for your SAY-Seabob in the same hull colour in the storage space provided, as well as the fenders. This SAY 42 is equipped with air conditioning, so one can enjoy comfort below deck in the spacious cabin with double bed, as well as a modern bathroom with lots of visible carbon details and a headroom of 1.90m. The large, stabilising bathing platform includes an electric-hydraulic bathing ladder for elegant boarding after a refreshing dip in the blue sea.
