SPECIFICATIONS

Overview

Designed for the unforgiving waters of the North Carolina coast, the MYSTIQUE 48 CC is the premier, best in class, sports-fishing vessel that compliments the finest concepts of the region's history-rich past with the latest in technological advances. With a fishing-first focus, the MYSTIQUE 48 CC also appeals to the family with ample luxury, amenities, and styling."With over 100 years of combined expertise, Mystique Boatworks' designers and builders have a proven track-record of constructing champion fishing vessels. The MYSTIQUE boats are extremely high-tech, composite-built boats that utilize the latest in technology and materials. It will exceed your expectations on the turbulent oceans with the power and luxury to bring you home safely and confidently.

BEAUTY - The natural, sleek lines of the MYSTIQUE 48 CC's Carolina flare, along with the tumblehome curvature and sculpted integrated bracket with the gentle turndowns are all proportionally correct, creating an artwork masterpiece. This completely unique boat, tailored to fit your needs, will make you the envy of all.

AWE - The MYSTIQUE 48 CC is a fishing machine, built for the serious angler. How the fisherman uses the boat is imperative to our design process. We are building a premium boat that is fast enough to reach much farther than ever before (can hold over 750 gallons of fuel), while returning the crew safely back to the dock in comfort, and refreshed after a day on the water.

POWER - The MYSTIQUE 48 CC is in a class of its own, powered by four Mercury Marine V12 Verado 600 HP engines, a total of 2400 HP capable of propelling the craft to speeds in excess of 60 MPH. The V12 is Mercury's quietest high-horsepower engine ever built. Contra-rotating propellers maximize thrust and ease low-speed maneuvering.

KEY PLAYERS: Allow me to start with an introduction of the key players on the management team. The legendary Jim Luxton, co-founder of Jarrett Bay Boatworks is responsible for our hull design and project management oversight of hull #1's build, a cold-molded production. Jim's designs are renown for their classic Carolina-flare and sleek lines, along with soft-riding hulls. More on that in the product discussion below.

MYSTIQUE is fortunate to have Brian Cooke on staff as VP, Engineering. Brian started off in the marine industry as an engineer for Grady-White. Brian later took a lead-engineering role at World-Cat, where he was instrumental in the catapult of both the quality and the breadth of the World-Cat offerings. Prior to joining the MYSTIQUE team, Brian's latest role was Director, Engineering for Bluewave Boats, a bay boat manufacturer out of Oklahoma. Bluewave experienced exponential growth and quantum quality improvement under Brian's leadership. Brian's forte is creating designs that meet the customers' needs, in a manner that is both aesthetically pleasing while reducing manufacturing complexity (thus, improving process stabilization, efficiency, and volume maximization). Prior to founding MYSTIQUE in early 2021, Keith Stevens served as VP, Operations at Regulator Marine for 12 years (2006-2012, 2015-2021). I was instrumental in improving Regulator's quality and product consistency during these years, as well as providing strong advocacy to the sales reps, in terms of meeting customer expectations, whether that be prior to build (requested design changes), during production (providing realistic and transparent status updates), as well as responsive customer support, post-purchase.

Basic Information

Category: center_console	Sub Category: Center Console
Model Year: 2024	Year Built: 2024
