SPECIFICATIONS

Overview

This tender is designed for extreme operations and deep explorations. The structure is enforced to MOD standards in order to satisfy the most demanding missions. Made specifically to tackle the challenging demands encountered in various yacht tender operations. This Iguana RIB is a one-of-a-kind model. Its highly modular deck includes lifting points, aviation-grade rails for seating arrangements, and hosts six shock-mitigating seats that protect passengers from up to 20g impacts, including side impacts. Ulman shock-mitigating seats ensure crew protection, making it safe for guests and reducing crew fatigue and accident risk. The integrated landing gear can land on just about any type of terrain, and the insulation inside the hull allows it to operate in extreme temperatures. Key features:

- U-shape superstructure for shock and vibration mitigation, providing the smoothest ride that can be found on this size boat.
- Self-bailing with ultra-large scuppers, this tender can be towed in any conditions.
- Amphibious with a proven all-terrain capacity to safely land even with 1.5m waves; the center tracks are much more efficient than the Sealegs or AMP models.
- 360° rotational capacity, meaning the tender can stay over the water when beach landing, allowing for drop-off or pick-up without driving on the beach.
- Ulman shock-mitigating seat for crew protection. Safe for guests, reducing crew fatigue and accident risk.
- Direct injection engine for the land drive allowing strong and efficient beach landing.
- Heavy-duty ladder.
- Military-grade decking to withstand boots and sand.
- Tubes in Orca 866 with double-ply reinforcement and anti-slip on the top surfaces.

Extensive electronic package with stabilized Flir camera, radar... Added value for charter yachts: This tender allows you to stand out and reduces crew fatigue.

Basic Information

Category: Boats

Model Year: 2021

Year Built: 2021

Refit Type: Total

Country: United States

Dimensions

LOA: 31' 6" (9.6mm)

Beam: 14.43

Min Draft: 1' 10" (0.55mm)

Speed, Capacities and Weight

Cruise Speed: 27 Knots Kts. (31 MPH)

Max Speed: 45 Knots Kts. (52 MPH)

Hull and Deck Information

Hull Material: Composite Fiberglass

Engine Information

Engines: 2

Manufacturer: Mercury

Engine Type: Outboard

Fuel Type: Gas/Petrol
