SPECIFICATIONS

Overview

The 41' Nighthawk is designed to provide the true Cigarette experience to all owners. It is the ideal center console for luxury day boating, due to its advanced technology, and successful combination of comfort, extravagance, and high performance.

The Nighthawk is unmatched to any other luxury performance center consoles due to its advanced-engineered twin step hull design, all carbon-fiber hardtop, and cutting-edge construction techniques that improve overall performance. The helm features three Garmin 8617 chart plotters flush mounted to an instrument panel CNC cut from a solid block of aluminum. The nano-coated instrument panel face is resistant to heat, reflections and fingerprints, and the perimeter of the panel is lit by RGB LED accent lighting to provide a distinct glow, creating the illusion that the dash is floating. The helm integrates cup holders and two glove boxes. Passengers can feel secure with stainless steel grab bars, and be in total comfort with an ergonomic CNC machined footrest. The Nighthawk features a state-of-the-art digital switching system, making control of vessel functions a breeze. This offers simple control of all systems on board, including automatic sequential engines starting with a single push of a button. Cigarette is notorious for being perfectionists. It is seen all throughout the vessel, but more specifically on the CNC milled aluminum pieces. The ergonomic helm seating is constructed with multi-density foam for ultimate comfort. All of the three electric forward helm seats are independently adjustable, allowing comfort for numerous individuals. Additionally, the seat bottoms can be converted into bolsters. All RGB ambient lighting can be digitally controlled through the multifunctional Garmin displays. It powers LED lighting throughout the deck with infinite color variations. This technology extends seamlessly into an underwater RGB system to create the perfect ambiance for a night out on the water. Along with high powered LED down lights in the hardtop and red captain's lighting. JL Audio Marine, the leader in the industry, creates audiophile quality systems that can withstand the rigors of the sea, wind, and open throttle. The optional Garmin Convenience Package can extend control centers beyond the helm, offering digital switching control at the bow and aft conversational area.

The four-pillar hardtop was skillfully engineered to provide a lower center of gravity to increase performance, yet not compromise comfort or the aesthetics. This all carbon-fiber hardtop features double curvature, a frameless clear-laminated safety glass for wind protection, integrated flood lights, boarding handrails, ambient lightning, and lastly, a telescopic sunshade.

- Brand NEW for immediately delivery
- Fully loaded boat
- Seakeeper 3 Stabilization
- Powered by 4 Mighty Mercury 500Rs engines
- Enhanced fuel tank capacity for extended journeys
- Carbon-fiber hardtop
- Telescoping aft sunshade
