Description When refinement and sophistication meet performance and power, you get the astonishing X26—and it's changing everything you know about a day on the water. There's no industry precedent for this level of craftsmanship and luxury—every inch is designed with thoughtful details and polished to premium perfection. It's impressively large at 26', and its hull shape provides a huge advantage with a smooth, dry ride even in big water. With available extras like a head and a refrigerator, you can extend your excursions much longer. The horizon marks the edge of what's possible—the furthest place we can go. With the X26, your horizons are completely redefined.

Manufacturer Provided Engine Description At 522HP (390kW), the 7.4L MPI is one of the most powerful catalyzed production marine engines available today. The superior design and materials of Ilmor-developed internal components provide unsurpassed performance and parts reliability. The naturally aspirated engine architecture provides more horsepower, better fuel economy, and longer parts durability than comparable supercharged engines. The 7.4L MPI conforms to EPA, CARB, and EU emissions standards, producing nearly 70% lower Carbon Monoxide emissions than other gasoline engines of comparable horsepower—a benefit for wake surfers and boarders riding its massive wakes. Additionally, each engine is hand built to the same quality standards as our IndyCar engines.
