SPECIFICATIONS

Overview

SAY Carbon Yachts - New Masterpiece - SAY 52

The Say Carbon Yachts 52, like all their models, are engineered and manufactured in Germany with the latest 100% carbon fiber technology and Petestep Design hull. Her dry weight is only 7.5 Tons. (15,000 Lbs)

Powered by Twin Volvo Penta 430 HP inboards, Aquamatic Duo-prop drives with joystick control maneuverability. Additionally, a carbon fiber hard top and Seakeeper stabilization add to her on-deck comfort. The Say 42's bright and air-conditioned cabin sleeps up to 4 with a full head and separate shower. Her cockpit is for entertaining with a refrigerator, sink, and lots of seating around a carbon fiber table that converts to a sunbed for those who want to relax. The water access is easy with a large swim platform and swim ladder.

But, the #1 experience is the adrenaline-packed driving in twin carbon fiber racing seats with Shockwave S6 bases, behind the Say Carbon roadster windscreen. The cockpit exudes technology and simplicity for drivers who push the envelope on acceleration and racetrack-like precision handling.

The results are:

1. **SEXY/UNIQUE LINES** - and an exhilarating boat to drive and turn heads in every marina. A "Supercar on the Water"
2. **FUN** - Ultra lightweight that accelerates to full speed in seconds with 870 HP and twin duo prop drives. Furthering the comfortable experience with Seakeeper stabilization.
3. **EFFICIENT** - Her wave-cutting bow combined with her hydrodynamic hull design and stability side wings, ensure maximum stability for great cornering at high speeds.
4. **ECONOMICAL**- Ultra lightweight lowers fuel consumption by 50% and extends the range, lowering daily fuel costs at cruising speed.
5. **SUSTAINABLE** - She's 50% lighter than any comparable boat in her class, therefore, reducing engine emissions by 50% at cruising speed.

For those few, who expect more.... Performance of a supercar with the functionality of an SUV.

Basic Information

Category: cruiser

Model Year: 2025
