Overview

Evolution through our eyes

Born to reveal new and endless possibilities, the *60 FLY - The Absolute Prisma* is a revolutionary model, uniquely built with a very high level of innovation for a yacht of this size.

Thanks to new glazed parapets balustrades, the external lines are enriched by elegant, transparent barriers which offer breathtaking views both from the flybridge and the aft cockpit. In a new progression of our cockpit design, it does not include fixed elements or furniture, and can be furnished according to the owner's needs. Moreover, thanks to two convenient side stairwells, the large swim platform is easily accessed for you to enjoy right at the water's edge. Adjacent to the platform, a fixed corridor offers direct access to the crew cabin.

This boat represents an incredible evolution both for our shipyard and the shipowner, offering high versatility of use and unparalleled livability in all areas, with no compromises.

A new world of possibilities

At one with the environment and highly enjoyable, the flybridge area on the upper deck serves as a second outdoor living room ideal to sunbathe, enjoy a cocktail, and navigate while socializing. The galley, dining, and relaxation zones, as well as the highly technological helm station, offer extreme livability, elegant lines, beautiful color contrasts, and lovely finishes. The bow area is also designed for maximum versatility thanks to a sunbathing zone and a comfortable sofa with a table. This is the perfect spot to listen to music, socialize, and enjoy some privacy; all in one, day and night.

State-of-the-art technology takes the form of modern and fully-equipped dashboards with easy-to-use equipment, always at hand. The helm stations on the main deck and flybridge have double seats and even a third mooring station can be installed astern. The 'green' approach of the shipyard is recognizable in the possibility of integrating solar panels in the hard top to achieve a lower environmental impact and excellent levels of autonomy, especially at anchor.

New perspectives to be discovered

The interiors are designed with comfort in mind, are elegantly furnished, and embellished with fine materials. A continuous design links the lounge, galley, and cockpit together. One has a feeling of wide and boundless spaces, enriched by modern lighting, entertainment systems, as well as ergonomic air conditioning.

Even the bow area discloses new perspectives thanks to the creation of a shipowner's quarter: a full-beam cabin. Raised and with high ceilings, it features exclusive furniture and elegant finishing touches. Its refined and quiet atmosphere enhances comfort and privacy with a large walk-in closet, sea-view vanity, and large side windows to feel surrounded by nature. The VIP cabin has all the characteristics of the master cabin: open, bright, with an en-suite head, and lots of rooms to feel just like at home.
